GitHub Licenses – Table of Titles and Precise Descriptions

License Title	Precise Description
MIT License	A permissive license allowing reuse, modification, distribution, and private use with only attribution required.
Apache License 2.0	A permissive license granting patent rights and allowing modification and distribution with notice preservation.
GNU General Public License v3.0 (GPL-3.0)	A strong copyleft license requiring derivative works to remain open source under the same license.
GNU General Public License v2.0 (GPL-2.0)	A copyleft license requiring source code disclosure for derivative works.
GNU Lesser General Public License v3.0 (LGPL-3.0)	A weak copyleft license permitting linking with proprietary software while keeping modifications open.
GNU Lesser General Public License v2.1 (LGPL-2.1)	Allows proprietary linking but enforces openness of modified LGPL components.
BSD 2-Clause License	A permissive license allowing redistribution with minimal conditions and attribution.
BSD 3-Clause License	Similar to BSD 2-Clause with an added non-endorsement clause.
Mozilla Public License 2.0 (MPL-2.0)	A file-level copyleft license allowing mixed proprietary and open-source projects.
Eclipse Public License 2.0 (EPL-2.0)	A weak copyleft license allowing commercial use with disclosure of modified source files.
GNU Affero General Public License v3.0 (AGPL-3.0)	A copyleft license requiring source disclosure for network-accessed software.
Unlicense	Dedicates software to the public domain with no restrictions.

Creative Commons Zero v1.0 (CC0)	Public-domain dedication allowing unrestricted use without attribution.
Creative Commons Attribution 4.0 (CC-BY-4.0)	Allows reuse and modification for any purpose with mandatory attribution.
Creative Commons Attribution-ShareAlike 4.0 (CC-BY-SA-4.0)	Requires derivative works to use the same license and provide attribution.
Artistic License 2.0	Allows modification and redistribution while preserving author credit.
Boost Software License 1.0	A permissive license allowing free use with attribution.
ISC License	A simple, permissive license equivalent to MIT.
Zlib License	A permissive license commonly used for libraries, allowing modification and redistribution.
Microsoft Public License (MS-PL)	A permissive license allowing use and distribution with limited trademark rights.
Microsoft Reciprocal License (MS-RL)	A weak copyleft license requiring modified files to remain under the same license.
